## **DETAILED ACTION**

## Election/Restrictions

- Restriction to one of the following inventions is required under 35 U.S.C.
  - Claims 1-10, and 28-48, drawn to a distributed system with a remote device and an address-matching server that maintains a database containing the set of validated addresses, classified in class 707, subclass 10.
  - II. Claims 11-23, drawn to a method for validating an address by receiving the address, accessing an addressing database, comparing the address with the database and storing information if a match is found, classified in class 707, subclass 3.
  - III. Claims 24-27, drawn to a method for importing data from a database by storing data in a particular format, receiving the address data with identification data, processing the identification data and address data, classified in class 707, subclass 103Y.
- 2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown

to be separately usable. For example, Group I is drawn to a distributed system with a remote device and an address-matching server that maintains a database containing the set of validated addresses, Group II is drawn to a method for validating an address by receiving the address, accessing an addressing database, comparing the address with the database and storing information if a match is found, Group III is drawn to a method for importing data from a database by storing data in a particular format, receiving the address data with identification data, processing the identification data and address data. See MPEP 806.05(d).

Page 3

- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
- 5. Applicants is reminded that upon the cancellation of claims to a nonelected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be

accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).
